Subject Index of Volume 68

Accelerating motion
of spherical particles in power law type non-Newtonian liquids, 85
Adipic acid
effects of powder production and of material processing on powder particle morphology of, 163
Agglomerate strength distributions
determination of:
application to model agglomerates, 63
application to titania processing, 71
calibration via ultrasonic forces, 53
Aggregates
uncompacted dust; measurement of tensile strength of, 159
Agitated systems
some practical rules applied to: powder mixing, 213
AlN/SiC composite powders
synthesis of, by floating-type fluidized-bed CVD, 153

Barium titanate particles
ultrafine; dielectric fluid preparation by dispersing, in kerosene, 235
Basalt wastes
briquetting of, 101
Briquetting
of basalt wastes, 101
Bubbles
expansion of freely bubbling fluidized bed, 117
origin of, and Geldart's classification, 13
segregation of solid particles of two sizes in bubble columns, 131
small: wake fractions of, in gas fluidized beds, 285
Bulk density
maximum; optimization of coal grind for, 175

Coal grind
optimization of, for maximum bulk density, 175
Coal heap
experimental study of packing of, 187
Combustor(s)
fluidized bed:
erosion of heat exchanger tube banks in, 37
gas and solid flow in freeboard of, 271

Density ratio
and size ratio and concentration; optimum combination of, to minimize free surface segregation, 145
Dielectric fluid preparation
by dispersing ultrafine barium titanate particles in kerosene, 235
Drag coefficient
variational model for prediction of fluid–particle interphase drag coefficient and particulate expansion of fluidized and sedimenting beds, 199

Erosion
of heat exchanger tube banks in fluidized-bed combustors, 37

Fluid energy grinding
classification function in, 79
Fluidized bed(s)
"The analysis of pressure fluctuations in a 2-D fluidized bed":
comments on, 287
editor's closure on, 291
response to comments on, 290
combustor; gas and solid flow in freeboard of, 271
combustors; erosion of heat exchanger tube banks in, 37
floating-type, CVD; synthesis of AlN/SiC composite powders by, 153
freely bubbling; expansion of, 117
gas; wake fractions of small bubbles in, 285
segregation of straw/sand mixtures in, in non-steady state, 31
three-phase; particle–liquid mass transfer in:
Newtonian liquids, 243
non-Newtonian liquids, 255
variational model for prediction of fluid–particle interphase drag coefficient and particulate expansion of fluidized and sedimenting beds, 199
Fluid–particle interphase drag coefficient
and particulate expansion of fluidized and sedimenting beds; variational model for prediction of, 199

Galena
properties of hydration layers on surface of, precoated with potassium ethyl xanthate, 125
Gas fluidized beds
wake fractions of small bubbles in, 285
Gas and solid flow
in freeboard of fluidized bed combustor, 217
Geldart's classification
origin of bubbles and, 13
Granular bed filters
influence of temperature on particle separation in, 263
Grinding
fluid energy; classification function in, 79
media; analysis of selection function for mills using balls as, 1

Harmonic endurance
new shape descriptor derived from polygonal harmonics, 137
Heat exchanger tube banks
erosion of, in fluidized-bed combustors, 37
Hydration layers
properties of, on surface of galena precoated with potassium ethyl xanthate, 125

Kerosene
dielectric fluid preparation by dispersing ultrafine barium titanate particles in, 235

Material processing
and power production; effects of, on powder particle morphology of adipic acid, 163

Elsevier Sequoia, Lausanne

Measurement methods
effects of, on properties of materials, 91
Mills
analysis of selection function for, using balls as grinding media, 1
Mixed particle populations
theoretical, with unimodal size distribution, 281
Model
agglomerates: application to; determination of agglomerate strength distributions, 63
variational, for prediction of fluid–particle interphase drag coefficient and particulate expansion of fluidized and sedimenting beds, 199
Morphology
powder particle; effects of powder production and of material processing on, of adipic acid, 163

Newtonian liquids
particle–liquid mass transfer in three-phase fluidized beds, 243

Packing
experimental study of, of coal heap, 187
Particle–liquid mass transfer
in three-phase fluidized beds:
Newtonian liquids, 243
non-Newtonian liquids, 255
Particle separation
influence of temperature on, in granular bed filters, 263
Particle suspensions
characterization of, by spectral extinction: numerical study, 109
Particulate expansion
of fluidized and sedimenting beds and fluid–particle interphase drag coefficient; variational model for prediction of, 199
Potassium ethyl xanthate
properties of hydration layers on surface of galena precoated with, 125
Powder mixing
some practical rules applied to agitated systems, 213
Powder production
and material processing; effects of, on powder particle morphology of adipic acid, 163
Power law type non-Newtonian fluids
accelerating motion of spherical particles in, 85
Pressure fluctuations
"The analysis of pressure fluctuations in a 2-D fluidized bed":
comments on, 287
editor's closure on, 291
response to comments on, 290

Sand/straw mixtures
segregation of, in fluidized beds in non-steady state, 31
Sedimenting beds
variational model for prediction of fluid–particle interphase drag coefficient and particulate expansion of fluidized and, 199

Segregation
free surface; optimum combination of size ratio, density ratio and concentration to minimize, 145
of solid particles of two sizes in bubble columns, 131
of straw/sand mixtures in fluidized beds in non-steady state, 31
Selection function
analysis of, for mills using balls as grinding media, 1
Silicon
synthesis of AlN/SiC composite powders by floating-type fluidized-bed CVD, 153
Size ratio
and density ratio and concentration; optimum combination of, to minimize free surface segregation, 145
Solid and gas flow
in freeboard of fluidized bed combustor, 271
Solid particles
segregation of, of two sizes in bubble columns, 131
Solid mixing
comments on paper "Recent developments in solids mixing" by L. T. Fan *et al.*, 195
Spectral extinction
characterization of particle suspensions by: numerical study, 109
Spherical particles
accelerating motion of, in power law type non-Newtonian liquids, 85
Straw/sand mixtures
segregation of, in fluidized beds in non-steady state, 31
Structural changes
and surface changes in wet ground minerals, 23
Surface
optimum combination of size ratio, density ratio and concentration to minimize free surface segregation, 145
properties of hydration layers on, of galena precoated with potassium ethyl xanthate, 125
and structural changes in wet ground minerals, 23
Synthesis
of AlN/SiC composite powders by floating-type fluidized-bed CVD, 153

Temperature influence
on particle separation in granular bed filters, 263
Tensile strength
measurement of, of uncompacted dust aggregates, 159
Theoretical mixed particle populations
with unimodal size distribution, 281
Titania processing
application to: determination of agglomerate strength distributions, 71

Ultrasonic forces
calibration via; determination of agglomerate strength distributions, 53
Unimodal size distribution
theoretical mixed particle populations with, 281

Wake fractions
of small bubbles in gas fluidized beds, 285
Wet ground minerals
surface and structural changes in, 23
